- “Thank you for adding new Forest Preserve in the Essex Chain Lakes, and Upper Hudson River.”
- “Scientists tell us that these places have global significance.”
- “Please protect these sensitive areas for our grandchildren.”
- “There is plenty of road access, but create a buffer and leave the lakes and rivers wild.”
- “Do everything you can to support a wilderness classification from the Adirondack Park Agency.”
- “Wilderness provides the best protection and supports the wild economy, too.”
- “A new Paul Schaefer Wild Rivers Wilderness would honor one of our greatest conservationists.”
- “A classification which allows widespread motorized uses deep into these areas would degrade their wild character, and violate your Executive Law.”
