

“FOREVER WILD” IS NOT FOREVER WITHOUT YOU.

1945: There was no funding to acquire Forest Preserve, and a lack of will to prevent the building of dams and reservoirs on wild rivers. Friends of the Forest Preserve changed all that.

2012: Adirondack Wild: Friends of the Forest Preserve builds on the legacy of Paul Schaefer, and others, to keep the promise of a wild Adirondacks for future generations.

ADIRONDACK WILD HAS TAKEN ACTION:

- Speaking out for our wild trout streams, which were channelized needlessly
- Organizing for ecological restoration of these aquatic systems
- Critiquing APA for failing to employ conservation design of Adirondack Club and Resort
- Educating about the hazards of fragmentation of intact Adirondack forests
- Defending wildlife and ecological integrity on our public and private lands
- Supporting critical new additions to the Forest Preserve
- Holding the governor accountable for upholding park laws
- Helping students find their footing through wilderness stewardship training
- Partnering to broaden and deepen support for the wild
